THÉODORE HESLING

theodore200531@outlook.com +33 6 75 49 33 72 Gardanne / Aix-en-Provence, France

Nationality: French (EU Citizen – Eligible for Swiss Work Permit B/L without quota delay)

To: The Engineering Recruitment Team **Date:** [Date of Application]
Company: [Target Company, e.g., Kudelski Group / STMicroelectronics / SICPA]
Location: Vaud / Geneva / Neuchâtel, Switzerland

Subject: Application for Embedded Security Engineering Intern (4 to 5 Months – from April 2027)

Dear Hiring Team,

I am writing to express my strong enthusiasm for joining **[Company Name]** as an intern in your engineering division. Currently in my second year of the Master of Science in Engineering at **Mines Saint-Étienne (ISMIN)**, I have focused my studies on the synergy between microcontroller architectures, low-level software, and robust hardware security.

During my cybersecurity internship at **Valeo**, I evaluated attack surfaces across electronic control units (ECUs) and analyzed secure communication protocols against automotive security standards. In parallel, my academic engineering projects have grounded my skills in physical hardware: I designed an autonomous self-levelling vessel driven by an **STM32 (ARM Cortex-M)** running bare-metal C to execute real-time closed-loop PID control over **custom-built differential capacitive water-level sensors** measuring liquid permittivity variations. Furthermore, my current coursework and projects incorporate **OpenSSL cryptographic primitives**, secure boot architectures, and mutual authentication to safeguard embedded endpoints.

Switzerland represents the pinnacle of precision, technological rigor, and innovation. **[Company Name]**'s leadership in hardware-rooted trust, secure silicon, and resilient embedded architectures makes your team the ideal environment where I wish to contribute my technical foundation, curiosity, and high standards of execution.

In addition to technical competence, I bring an adaptable and multicultural perspective: native French, bilingual English (C2 – IGCSE & A-Levels), certified Spanish (C1), certified Chinese (C1 – HSK 3), and ongoing self-directed study of German (*Nicos Weg*). My service as Treasurer of Junior Mines Provence cultivated acute accountability, financial governance, and strict compliance with national quality audits. Holding French/EU citizenship ensures a straightforward, quota-free Swiss B/L work authorization process.

Available starting **April 2027 for a duration of 4 to 5 months** (fully fulfilling the 16-week French CTI accreditation requirement), I would welcome the opportunity to discuss how my proactive mindset and skills can support **[Company Name]**'s ongoing projects. Thank you for your time and consideration.

Sincerely,

Théodore Hesling
